PROFILE

Software developer who has built and supported full-stack applications for SaaS and ecommerce workflows. Shipped AutoSortPro and M2 InstaCount using Python, Flask/FastAPI, React, and PostgreSQL. Work with users after launch to investigate issues and improve the product.

TECHNICAL SKILLS

Languages & frameworks	Python, JavaScript, SQL, React, Flask, FastAPI, Electron
Data & integrations	PostgreSQL, SQLite, Magento 2 API, Auth0, Stripe API, OpenAI API, AWS (IAM, S3, SES, Rekognition)
Tools	Git, Postman, Jira, PyTest, Jest, Tailwind

SELECTED ENGINEERING WORK

AutoSortPro

Python, FastAPI, Electron, React, PostgreSQL, Auth0, Stripe, OpenAI, AWS

- Built an AI-powered file organization application that organizes, tags, and summarizes files.
- Reached 132 active users and organized 12.5K+ files; implemented authentication, payments, AI features, and file processing.

M2 InstaCount

Python, Flask, React, PostgreSQL, Magento 2 API

- Built scanner-based Magento product lookup, receiving with CSV export, and Veeqo batch picking.
- In one operation, a roughly 4,500-SKU year-end count took 22 hours versus 42 before; four timed picks averaged 22% less time.

OpenHome

Python | Grant-funded prototype, Jan 2024 - Apr 2024

- Developed a Python application for an AI-powered smart-home OS prototype presented to 100+ potential investors.

PROFESSIONAL EXPERIENCE

Freelance Software Developer | Remote | Jun 2023 - Present

- Built and supported full-stack applications; shipped fixes based on reported user issues.
- Investigated authentication, payments, file-processing, and API issues using logs, API responses, and database checks.

Technical Systems Engineer, Ecommerce Operations | 2022 - Present

- Built M2 InstaCount around inventory and receiving workflows in a business processing 75+ daily orders.
- Troubleshot SKU mismatches and inventory discrepancies; maintained Magento admin and storefront updates.

Application Developer, Contract | OpenHome | Jan 2024 - Apr 2024

- Built the Python application used in the AI smart-home OS prototype.
